

ORBIT HOUSING ASSOCIATION

KENT, SURREY

Clifford Devlin were appointed onto Orbit Housing framework contract in 2009 to provide asbestos removal and remediation services to the Association's affordable housing stock in the South East.

We deploy teams of trained operatives to remove asbestos-containing materials from floor tiles, roof sheets and artex on a continuous basis.

Notifiable work such as the removal of insulating board found in risers and other cavities requires the installation of mini-enclosures which seal the area and prevent the emission of hazardous fibres during the removal process.

The accessibility of our own licensed asbestos waste transfer station (which is situated in Bow with excellent access to the A13, A12 and M25) has proved to be very useful in enabling us to swiftly and efficiently dispose of hazardous waste from Orbit Housing Estates located in Erith, Chatham and Croydon.

Discipline: Asbestos Removal

Contract: Framework

Duration: 18 months +

Start date: Jan 2008

Value: £80k per annum
